

WORLD STANDARDS DAY

14 OCTOBER 2015

LUXEMBOURG

Standards
The world's **common** language

WORLD STANDARDS DAY

Standards make life simpler. They organize complexity by *translating* technological processes & requirements into one consistent *speech*, ensuring safety, quality, functionality, interoperability, energy & cost efficiency. To raise awareness about the importance of standards from the economic and social perspective, every year on the 14th of October countries all over the world celebrate World Standards Day. This event aims to honor thousands of scientific and industrial experts who contribute to making our society better through the means of international standards.
