# **ILNAS/PSCQ/Pr001**

## **Supervision of Qualified Trust Service Providers (QTSPs)**

### Modifications:

- add requirements on periodic surveillance reviews
- unify the description of ad hoc audits
- add a section on national legal requirements applicable to QTSPs
- refer to the amended eIDAS Regulation

Approved by: Alain Wahl	Version 6.6 – 08.07.2024	Page 2 of 16

## 1 Introduction

The Luxembourg Institute for standardisation, accreditation, safety, and quality of goods and services (ILNAS, “Institut Luxembourgeois de la Normalisation, de l’Accréditation, de la Sécurité et qualité des produits et services”) is placed under the administrative supervision of the Minister of the Economy of the Grand Duchy of Luxembourg. The legal missions of ILNAS – Digital Trust Department are defined in [1].

ILNAS, via the “Digital Trust Department”, is notably charged with the supervision of QTSPs (Qualified Trust Service Providers) that are established in the Grand Duchy of Luxembourg and offer qualified trust services.

This document describes the scheme, requirements and process applied by the ILNAS – Digital Trust Department for the supervision of QTSPs. The supervision scheme is based upon Amended Regulation (EU) 910/2014 of the European Parliament and of the Council on electronic identification and trust services for electronic transactions in the internal market and repealing Directive 1999/93/EC (the amended eIDAS Regulation) [2].

## 2 Purpose of the procedure

The purpose of this procedure is to describe the process of supervising QTSPs. The procedure addresses primarily the clients and the staff of ILNAS – Digital Trust Department.

## 3 Definitions

For the requirements of this document, the definitions given in the amended eIDAS Regulation [2] apply. Furthermore, we denote by (Q)TSP a TSP that is either qualified or not, and by QTSP a TSP that holds the qualified status.

## 5 Supervision scheme for QTSPs

**Figure 1 National supervision scheme** illustrates the model for QTSP supervision. This scheme relies on the following elements:

1. The national accreditation body of a Member state (e.g., OLAS in Luxembourg) that has signed the European cooperation for Accreditation (EA) multilateral agreement (EA MLA), accredits the competence of conformity assessment bodies to carry out conformity assessment of a QTSP and the qualified trust services it provides;
2. **Conformity assessment bodies (CABs)**, independent bodies of assessors, accredited by the national accreditation body of a Member state in accordance with Article 3 (18) of the **amended** eIDAS Regulation, carry out conformity assessments of QTSPs and the qualified trust services they provide against the requirements of the **amended** eIDAS Regulation [2]. The CAB should also be accredited according to the requirements in [ISO/IEC 17065:2012](#) as well as those in [ETSI EN 319403](#).
3. **ILNAS – Digital Trust Department**, the national supervisory body is responsible for the supervision of QTSPs and for establishing, maintaining and publishing the national trusted list (see [1]);
4. The national **trusted list** is a list which includes information on the QTSPs established in Luxembourg and supervised by ILNAS as well as information on the qualified trust services they provide.

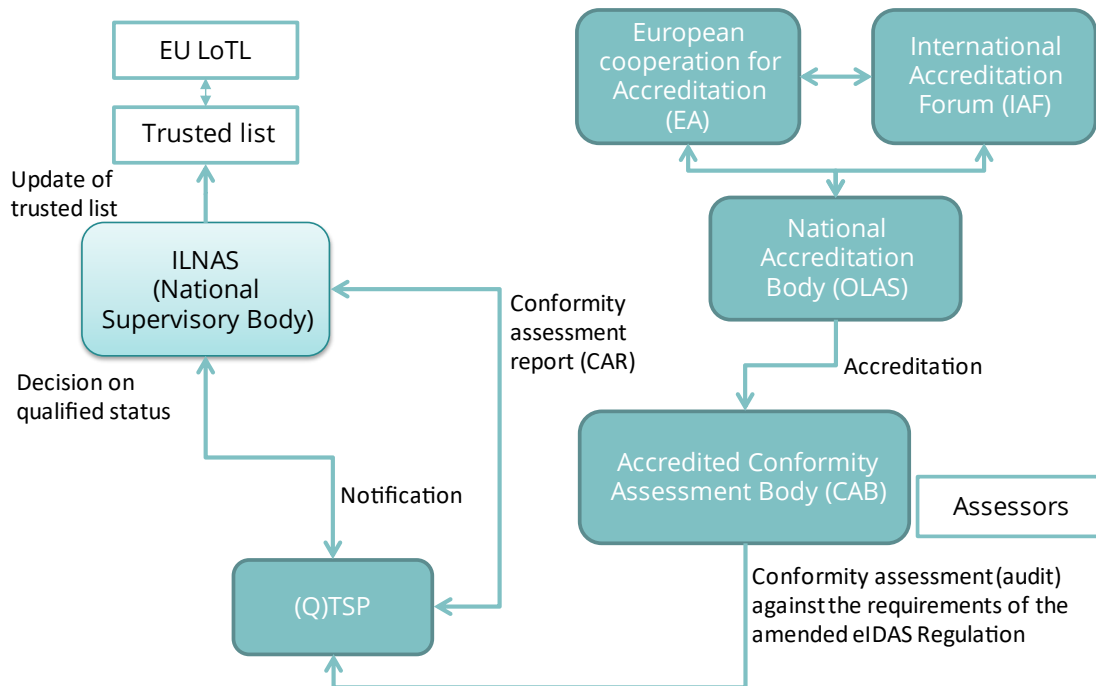

Figure 1 National supervision scheme

**5.1 Requirements for qualified certificates for electronic signatures, qualified certificates for electronic seals and qualified certificates for website authentication in Annexes I (b), III (b) and IV (b), respectively, of the amended eIDAS Regulation**

The amended eIDAS Regulation specifies in its annexes I (b), III (b) and IV (b) that qualified certificates for electronic signatures, qualified certificates for electronic seals and qualified certificates for website authentication, respectively, have to contain:

*“(b) a set of data unambiguously representing the qualified trust service provider issuing the qualified certificates including*

*at least, the Member State in which that provider is established and:*

*— for a legal person: the name and, where applicable, registration number as stated in the official records,*

*— for a natural person: the person’s name;”*

If a registration number as indicated in official records exists for the qualified trust service provider, this registration number has to be included in the qualified certificates.

If the qualified trust service provider is a legal person, then the identity of the issuer in the qualified certificates has to contain at least the following attributes:

Issuer	Attribute	Value
	countryName (OID 2.5.4.6)	Name of the country in which the trust service provider is established
	organizationName (OID 2.5.4.10)	Full official name of the trust service provider  If the trust service provider is registered in the RCS (Registre de Commerce et des Sociétés), the name as registered in the RCS shall be taken.
	serialNumber (OID 2.5.4.5) or organizationIdentifier (OID 2.5.4.97) <sup>1</sup>	Registration number of the trust service provider as stated in the official records and structured as in Clause 5.1.4 of ETSI EN 319 412-1  For VAT identification numbers (value added tax), ILNAS recommends to use the format  VATXY-<identifier>  where the country code XY does not appear in <identifier> as a prefix. For example, VATLU-12345678.  If both a VAT identification number and an RCS (Registre de Commerce et des Sociétés) number exist, then the VAT number shall be taken.
	commonName (OID 2.5.4.3)	Name of the trust service provider or of the certificate issuance service

	<b>Digital Trust Process</b>	
	<b>ILNAS/PSCQ/Pr001</b>	
Approved by: Alain Wahl	Version 6.6 – 08.07.2024	Page 6 of 16

**5.2 Requirements for qualified trust service providers issuing qualified certificates for electronic signature or for electronic seal in the case where the electronic signature creation data resp. electronic seal creation data are managed by the qualified trust service provider on behalf of the signatory resp. creator of seal:**

1. The Qualified Trust Service Provider (QTSP) complies with the applicable requirements of the amended eIDAS Regulation.
2. The conformity of the qualified electronic signature (resp. seal) creation device shall be certified in accordance with Article 30 (resp. Article 39 (2)) of the amended eIDAS Regulation.
3. The Qualified Trust Service Provider implements the qualified electronic signature (resp. seal) creation device in accordance with the conditions of use specified in the Certificate of Conformity of the qualified signature (resp. seal) creation device and in the related certification report.
4. The Qualified Trust Service Provider has an up-to-date risk analysis that covers the risks associated with the use of the qualified electronic signature (resp. seal) creation device.

The conformity assessment body (CAB) has to check whether all of the above requirements are fulfilled.

Remark: Neither the certificate of conformity with respect to the applicable requirements of the amended eIDAS Regulation nor the certification report shall refer to opinion reports.

**Criteria relating to the authentication of the legal person to the remote signature server for the creation of « remote qualified electronic seal creation »:**

- The confidentiality and integrity of the data exchanged between the user and the remote signing server shall be guaranteed.
- Strong authentication of the user and the QTSP shall be put in place.
- The transmission of data between the user and the QTSP's environment shall be protected by appropriate cryptographic means.<sup>2</sup>
- If secret authentication information of the user (e.g., passwords, authentication codes, cryptographic keys) are stored on the "server" side (QTSP environment), then this secret authentication information shall be stored securely.
- Organizational measures shall be put in place that clarify the responsibilities of the legal person in the context of the usage of the qualified trust service (in particular, regarding the management of secret authentication information).
- The binding between "authentication" and "data to seal" shall be guaranteed.
- The elements mentioned above shall be treated in the risk analysis; mitigating measures shall be taken accordingly.

**General recommendations:**

- A policy on the use of cryptographic measures (e.g., algorithms, security protocols, hash functions, key management, key sizes) to protect the confidentiality, integrity, and authenticity of data should be developed and implemented.
- A policy on password management should be developed and implemented.
- The qualified trust service provider should monitor the authentication means that a user is allowed to use to authenticate himself to the qualified trust service provider's environment and

<sup>1</sup> Either of the two attributes is only required if a registration number of the trust service provider as stated in the official records exists.

<sup>2</sup> To meet this requirement, state-of-the-art security protocols (e.g., TLS) shall be used to secure the transmission of data between the user and the qualified trust service provider's environment.

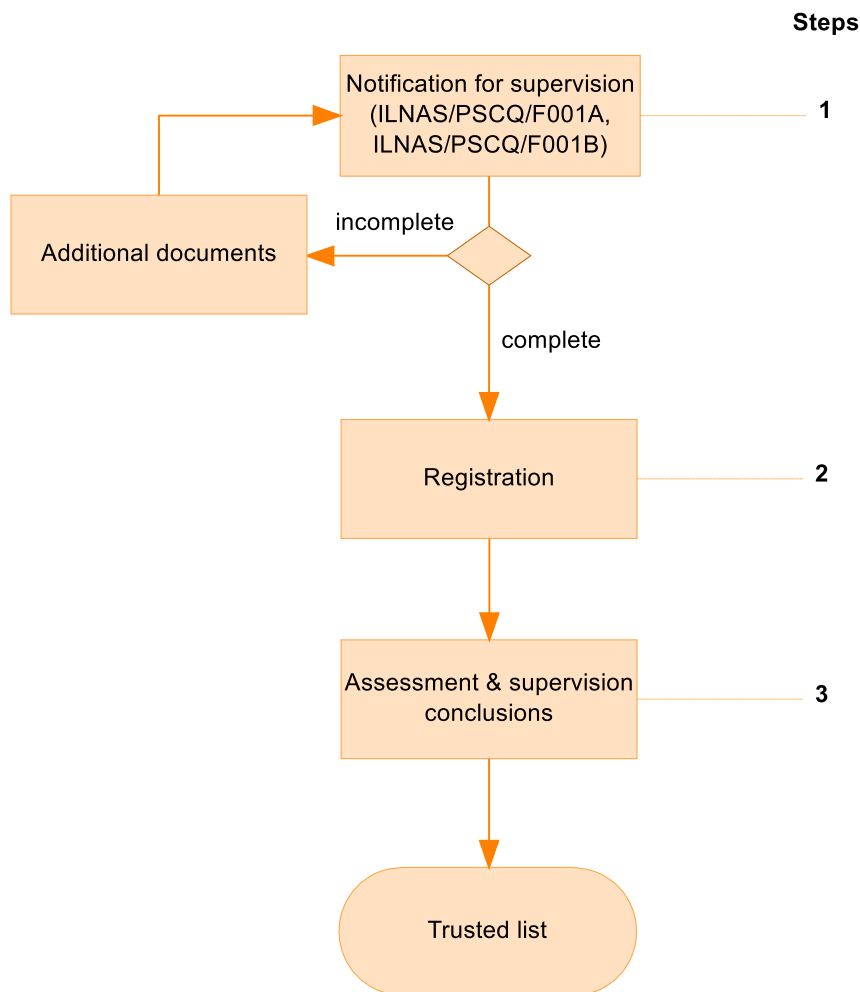

should take appropriate measures in case of compromise of one of these authentication means.

- The transmission of data inside the qualified trust service provider’s environment should be protected by appropriate cryptographic means. State-of-the-art security protocols (TLS, IPSEC, ...) should be used to secure the transmission of data between technical assets in the qualified trust service provider’s environment.

## 6 Supervision process

~~Figure 2 Supervision process~~ ~~Figure 2 Supervision process~~ illustrates the different steps to obtain the “qualified” status:

1. Notification;
2. Registration of the QTSP;
3. Assessment & supervision conclusions.

**Figure 2 Supervision process**

### Step 1: Notification

A notification of a (Q)TSP who intends to provide qualified trust services is made by means of application form ILNAS/PSCQ/F001A - *Notification form to provide qualified trust services*.

The form includes, in addition to general information of the (Q)TSP, the scope of supervision. The form has to be dated and signed by a representative authorized to commit the (Q)TSP.

	<b>Digital Trust Process</b>	
	<b>ILNAS/PSCQ/Pr001</b>	
Approved by: Alain Wahl	Version 6.6 – 08.07.2024	Page 8 of 16

The (Q)TSP must also provide all the supporting documents listed in the notification form.

A (Q)TSP who intends to issue qualified certificates for electronic signature and/or for electronic seal, where the electronic signature creation data resp. electronic seal creation data are managed by the (Q)TSP on behalf of the signatory resp. creator of seal, is requested to also provide a description and/or diagram of the protocol between the user and the remote signing server to sign (resp. seal) data, in addition to the documents above.

The notification form enables the (Q)TSP to officially notify its intent to provide qualified trust services and constitutes "the triggering factor" for the supervision process. The form is also used to provide the ILNAS – Digital Trust Department - with any updated information about supervised QTSPs, which have undergone major changes to their structure, their organization or in their resources required to carry out the activities covered by the notification.

Conformity assessment reports and other documents provided by the QTSP to ILNAS shall be in one of the following languages: English, French, German or Luxembourgish.

The duly completed, dated and signed notification form, together with supporting documents, must be mailed or brought in an envelope marked "confidential" to:

**ILNAS**  
**Digital Trust Department**  
**1, avenue du Swing**  
**L-4367 Belvaux**

Alternatively, the notification can be sent electronically, in a secure way, to ILNAS (Digital Trust Department). The Digital Trust Department ([confiance-numerique@ilnas.etat.lu](mailto:confiance-numerique@ilnas.etat.lu)) has to be contacted prior to sending the form and the supporting documents to discuss the transmission modalities.

On receipt of a notification form, the **administrative assistant** reviews the application and resources on the basis of *ILNAS/PSCQ/F004A – Check-list: Revue de la notification pour surveillance*. The scope of supervision is validated by the **supervision manager**.

**Multi-Site organizations:** For the supervision of a multi-site (Q)TSP organization, the administration of the notification is described in Appendix ILNAS/PSCQ/A013 – *Supervision of multi-site QTSPs*.

If necessary, the Digital Trust Department can request additional documents not indicated in the notification form from the (Q)TSP before to recording the file.

**Application to reduce, to voluntarily suspend or cancel supervision**

A QTSP may apply at any time for a reduction, a suspension or cancelling of its qualified status by a letter sent to the ILNAS – Digital Trust Department - and signed by a representative authorized to commit the QTSP. The Trusted list or the scope of supervision is then updated and the changes notified to the QTSP.

The suspension leads to the prohibition for the TSP to refer to its status of supervised QTSP. Each voluntary suspension on which the QTSP hasn't done any follow-up within 18 months following the date of reception of the mail results in a change of status on the trusted list.

**Step 2: Registration**

ILNAS – Digital Trust Department - allocates an identification number to each notification for supervision. This number is valid for the whole supervision and can be used in all correspondence. The Digital Trust Department will transmit the number to the (Q)TSP making the notification for supervision. The notification for supervision is validated by the **head of the Digital Trust Department (Fr.: “chef du Département de la confiance numérique”)**.

	<b>Digital Trust Process</b>	
	<b>ILNAS/PSCQ/Pr001</b>	
Approved by: Alain Wahl	Version 6.6 – 08.07.2024	Page 9 of 16

The case manager opens Form ILNAS/PSCQ/F018 –*Historique du Prestataire de Services de Confiance Qualifiés (PSCQ)* internally, which enables him to ensure traceability of key events during supervision (e.g., audits, supervision meetings). This record is reviewed by the supervision manager.

### Step 3: Assessment & supervision conclusions

The supervision shall ensure that the QTSP and its qualified trust services meet the applicable requirements laid down in the [amended](#) eIDAS Regulation [2]. In this regard the certification shall be renewed every 2 years (via a reassessment audit) and a surveillance audit shall be conducted yearly. Furthermore, the EDP audit should be renewed every 2 years.

The following elements are notably reviewed during supervision:

- Accreditation and scope of the conformity assessment body;
- Certification and scope of the conformity assessment of the QTSP;
- Coverage of the applicable requirements in [2] in the conformity assessment report;
- The provided documentation;
- If applicable, the resolution of nonconformities (including corrective actions) detected during conformity assessment.

The ILNAS – Digital Trust Department may request a CV of the auditors who performed the conformity assessment, if deemed necessary.

The management of the national Trusted List is under the authority of the ILNAS – Digital Trust Department (*see also*, ILNAS/PSCQ/Pr002 – *Gestion de la Liste de confiance (“Trusted list”)*).

### Decision by ILNAS

According to Article 21, paragraph 2, of the [amended](#) eIDAS-Regulation:

“The supervisory body shall verify whether the trust service provider and the trust services provided by it comply with the requirements laid down in this Regulation and, in particular, with the requirements for qualified trust service providers and for the qualified trust services they provide.

In order to verify the compliance of the trust service provider with the requirements laid down in Article 21 of Directive (EU) 2022/2555, the supervisory body shall request the competent authorities designated or established pursuant to Article 8(1) of that Directive to carry out supervisory actions in that regard and to provide information about the outcome without undue delay and in any event within two months of receipt of that request. If the verification is not concluded within two months of the notification, those competent authorities shall inform the supervisory body specifying the reasons for the delay and the period within which the verification is to be concluded.

Where the supervisory body concludes that the trust service provider and the trust services provided by it comply with the requirements laid down in this Regulation, the supervisory body shall grant qualified status to the trust service provider and the trust services it provides and inform the body referred to in Article 22(3) for the purposes of updating the trusted lists referred to in Article 22(1), not later than three months after notification in accordance with paragraph 1 of this Article.~~The supervisory body shall verify whether the trust service provider and the trust services provided by it comply with the requirements laid down in this Regulation, and in particular, with the requirements for qualified trust service providers and for the qualified trust services they provide.~~

~~If the supervisory body concludes that the trust service provider and the trust services provided by it comply with the requirements referred to in the first subparagraph, the supervisory body~~

	<b>Digital Trust Process</b>	
	<b>ILNAS/PSCQ/Pr001</b>	
Approved by: Alain Wahl	Version 6.6 – 08.07.2024	Page 10 of 16

~~shall grant qualified status to the trust service provider and the trust services it provides and inform the body referred to in Article 22(3) for the purposes of updating the trusted lists..”~~

Consequently, the final decision on granting the qualified status to a service provider and on inserting the trust services of the service provider into the national Trusted List is taken by ILNAS as supervisory body of qualified trust service providers.

After validation by the Director of ILNAS, the Digital Trust Department notifies the (Q)TSP of its decision. In case of a positive decision (i.e., qualified status grant) and if certain criteria in Form ILNAS\_PSCQ\_F004A (for the initial notification) are met, ILNAS issues a certificate to the QTSP.

**Note 1:**

In case of an ongoing supervision, if the applicable requirements in the amended eIDAS Regulation are met by the (Q)TSP and its (qualified) trust services, then the qualified status is either granted to the TSP and its trust services (in case of an initial conformity assessment) or retained by the QTSP and its qualified trust services.

If the applicable requirements in the amended eIDAS Regulation are not met by the QTSP or the qualified trust services it provides and if the QTSP fails to resolve non-conformities as requested by ILNAS – Digital Trust Department, then ILNAS – Digital Trust Department may withdraw the qualified status of the QTSP or the qualified status of the concerned trust service(s). The status in the trusted list is then set to “withdrawn”.

**Note 2:**

After each re-assessment audit, the QTSP sends the conformity assessment report and related certificates issued by the conformity assessment body to ILNAS. The **administrative assistant** of the Digital Trust Department fills in the form ILNAS\_PSCQ\_F004B and the **supervision manager** checks the conformity assessment report. The supervision manager may send questions on the report and the related certificates to the QTSP. The conclusions of the supervision manager are reported to the head of the Digital Trust Department who in turn presents them to the Director of ILNAS. After validation by the Director of ILNAS, the Digital Trust Department notifies the QTSP of its decision. In case of a positive decision (i.e., qualified status renewal of the QTSP) and if certain criteria in Form ILNAS\_PSCQ\_F004B are met, ILNAS issues a certificate to the QTSP.

**Periodic surveillance reviews**

Periodic surveillance reviews may take place in the form of supervision meetings between representatives of the QTSP and of ILNAS – Digital Trust Department. During supervision meetings, the QTSP will be given an opportunity to discuss recent events, incidents, or planned changes that affect the qualified trust services it provides with representatives of ILNAS – Digital Trust Department.

Supervision meetings are documented using the form ILNAS/PSCQ/F016 - *Compte rendu des réunions dans le cadre de la surveillance des PSCQ*. Meeting minutes must be signed by a representative of the QTSP that participated in the meeting or by an otherwise authorized representative of the QTSP

- with a hand-written signature if the meeting minutes are to be submitted to ILNAS – Digital Trust Department in paper form, or
- with a qualified signature according to the amended eIDAS regulation if the meeting minutes are to be submitted to ILNAS – Digital Trust Department in electronic form.

The frequency of supervision meetings is determined by ILNAS – Digital Trust Department based on a risk analysis.

Instead of holding supervision meetings, ILNAS – Digital Trust Department may request the QTSP to fill in a supervision review questionnaire.

	<b>Digital Trust Process</b>	
	<b>ILNAS/PSCQ/Pr001</b>	
Approved by: Alain Wahl	Version 6.6 – 08.07.2024	Page 11 of 16

## Extraordinary (ad hoc) audits mandated by ILNAS

Besides the yearly surveillance audit and the 2-yearly re-assessment audit, in application of Article 20 (2) of the eIDAS Regulation, ILNAS – Digital Trust Department may require a QTSP to undergo an audit at any time and at its own expense to verify its compliance with some or all of the applicable requirements, in application of Article 20 (2) of the amended eIDAS Regulation.

Such an audit may be carried out by members of ILNAS – Digital Trust Department or by external auditors. Auditors that are not employed by ILNAS have to sign the code of ethics for external collaborators (form ILNAS/MAC/F019) before they can participate in the audit.

Extraordinary audits can be triggered by the occurrence of certain events, for example:

- Events detected by ILNAS – Digital Trust Department, or
- Events notified by the QTSP to ILNAS – Digital Trust Department, e.g.:
  - Termination of one or more qualified trust services,
  - Changes of policies or procedures of the QTSP,
  - Major changes in the documentation of the QTSP,
  - Change in the provision of one or more qualified trust services,
  - Provision of a new trust service of the same type as trust services already provided by under significantly different policies,
  - Security breaches,
  - Personal data breaches,
  - Complaints.

Depending on the outcome of the ad hoc conformity assessment, ILNAS – Digital Trust Department may update the status of the QTSP or its qualified trust service(s) in the national trusted list.

## 7 National Legal Requirements Applicable to QTSPs

### 7.1 Amended Law of 14<sup>th</sup> August 2000 on electronic commerce

In particular, QTSPs need to follow the requirements introduced in the following articles of the amended Law of 14<sup>th</sup> August 2000 on electronic commerce [13]:

- Article 19
- Article 20
- Article 21
- Article 21 bis
- Article 22
- Article 22 bis
- Article 22 ter
- Article 26
- Article 32
- Article 34
- Article 34 bis
- Article 45 bis

## **78 Standard's for assessing (Q)TSPs**

### **78.1 –Tools to support compliance**

The conformity assessments shall be against the requirements of the amended eIDAS Regulation [2]. However, the following standards and technical specifications can be used as a tool to support the demonstration of compliance to eIDAS requirements (non-exhaustive list):

<b>Scope of (Q)TSP activities or systems</b>	<b>Standard</b>
General policy requirements for trust service providers supporting electronic signatures	ETSI EN 319 401
Policy and security requirements for Trust Service Providers issuing certificates; Part 1: General requirements	ETSI EN 319 411-1
Policy and security requirements for Trust Service Providers issuing certificates - Part 2: Requirements for Trust service providers issuing EU qualified certificates ;	ETSI EN 319 411-2
Certificate Profiles	ETSI EN 319 412
Policy and Security Requirements for Trust Service Providers issuing Time-Stamps	ETSI EN 319 421
Time-stamping protocol and time-stamp token profiles	ETSI EN 319 422
Policy and security requirements for Electronic Registered Delivery Service Providers	ETSI EN 319 521
Policy and security requirements for Registered Electronic Mail Service Providers	ETSI EN 319 531
Cryptographic Suites	ETSI TS 119 312
Security Requirements for Trustworthy Systems Supporting Server Signing	CEN/TS 419 241:2014
Security requirements for trustworthy systems managing certificates and time-stamps	CEN/TS 419 261:2015
Internet X.509 Public Key Infrastructure Certificate Policy and Certification Practices Framework	IETF RFC 3647
Internet X.509 Public Key Infrastructure Time-Stamp Protocol	IETF RFC 3161
Cryptographic Message Syntax	IETF RFC 2630

## 87.2 Criteria Trusted Lists

The table below contains an extract from ETSI TS 119 612 V2.1.1 (2015-07) - D.5 EU specific Trusted Lists URIs [4] (pages 62-63):

<p><b>Under Supervision</b></p> <p>“The service identified in "Service digital identity" (see clause 5.5.3) provided by the trust service provider identified in "TSP name" (see clause 5.4.1) is currently under supervision, for compliance with the provisions laid down in the applicable European legislation, by the Member State identified in the "Scheme territory" (see clause 5.3.10) in which the trust service provider is established.”</p> <p>URI: <a href="http://uri.etsi.org/TrstSvc/TrustedList/Svcstatus/undersupervision">http://uri.etsi.org/TrstSvc/TrustedList/Svcstatus/undersupervision</a></p>
<p><b>Supervision of Service in Cessation</b></p> <p>“The service identified in "Service digital identity" (see clause 5.5.3) provided by the trust service provider identified in "TSP name" (see clause 5.4.1) is currently in a cessation phase but still supervised until supervision is ceased or revoked. In the event a different person than the one identified in "TSP name" has taken over the responsibility of ensuring this cessation phase, the identification of this new or fallback person (fallback trust service provider) shall be provided in "Scheme service definition URI" (clause 5.5.6) and in the "TakenOverBy" extension (clause 5.5.9.3) of the service entry. "Supervision of Service in Cessation" status shall be used when a TSP directly ceases its related services under supervision; it shall not be used when supervision has been revoked.”</p> <p>URI: <a href="http://uri.etsi.org/TrstSvc/TrustedList/Svcstatus/supervisionincessation">http://uri.etsi.org/TrstSvc/TrustedList/Svcstatus/supervisionincessation</a></p>
<p><b>Supervision Ceased</b></p> <p>“The validity of the supervision assessment has lapsed without the service identified in "Service digital identity" (see clause 5.5.3) being re-assessed. The service is currently not under supervision any more from the date of the current status as the service is understood to have ceased operations. "Supervision Ceased" status shall be used when a TSP directly ceases its related services under supervision; it shall not be used when supervision has been revoked.”</p> <p>URI: <a href="http://uri.etsi.org/TrstSvc/TrustedList/Svcstatus/supervisionceased">http://uri.etsi.org/TrstSvc/TrustedList/Svcstatus/supervisionceased</a></p>
<p><b>Supervision Revoked</b></p> <p>“Having been previously supervised, the trust service provider's service and potentially the trust service provider itself has failed to continue to comply with the provisions laid down in the applicable European legislation, as determined by the Member State identified in the "Scheme territory" (see clause 5.3.10) in which the trust service provider is established. Accordingly the service has been required to cease its operations and shall be considered by relying parties as ceased for the above reason. The status value "Supervision Revoked" may be a definitive status, even if the trust service provider then completely ceases its activity; it shall not be migrated (without any intermediate status) to either "Supervision of Service in Cessation" or to "Supervision Ceased" status in this case. The only way to change the "Supervision Revoked" status is to recover from non-compliance to compliance with the provisions laid down in the applicable European legislation according the appropriate supervision system in force in the Member State owing the trusted list, and regaining "Under Supervision" status. "Supervision of Service in Cessation" status, or "Supervision Ceased" status shall be used when a TSP directly ceases its related services under supervision; they shall not be used when supervision has been revoked.”</p> <p>URI: <a href="http://uri.etsi.org/TrstSvc/TrustedList/Svcstatus/supervisionrevoked">http://uri.etsi.org/TrstSvc/TrustedList/Svcstatus/supervisionrevoked</a></p>

#### **Note 1** (~~Ad hoc conformity assessments~~):

~~Besides the yearly surveillance audit and the 2-yearly re-assessment audit, the supervisory body may, according to Article 20 (2) of the eIDAS Regulation, at any time audit or request a conformity assessment body to perform a conformity assessment of a qualified trust service provider at the expense of the trust service provider. The aim of this audit is to confirm that the qualified trust service provider and its qualified trust services fulfil the requirements laid down in this eIDAS Regulation. These ad hoc audits are triggered by the occurrence of certain events, for example:~~

~~Events detected by the ILNAS, or  
Events notified by the QTSP to the ILNAS, e.g.:  
Termination of one or more qualified trust services,  
Changes of policies or procedures of the QTSP,  
Major changes in the documentation of the QTSP,  
Change in the provision of one or more qualified trust services,  
Provision of a new trust service of the same type as trust services already provided by under significantly different policies,  
Security breaches,  
Personal data breaches,  
Complaints.~~

~~Depending on the outcome of the ad hoc conformity assessment, the ILNAS may update the status of the QTSP or its qualified trust service(s) in the national trusted list.~~

#### **Note 2** (~~Supervision meetings~~):

~~There shall be no larger period than six months for periodic surveillance of the QTSP by ILNAS – Digital Trust Department. The periodic supervision meetings are recorded in the form ILNAS/PSCQ/F018 *Historique du Prestataire de Services de Confiance Qualifié (PSCQ)*. The minutes of the periodic supervision meetings are recorded using the form ILNAS/PSCQ/F016 – *Compte rendu des réunions dans le cadre de la surveillance des QTSP*. A periodic supervision meeting may be replaced by members of the Digital Trust Department being present during an audit~~

**Conformity assessment – Audit time**  
**9 Conformity assessment – Audit time**

Conformity assessment bodies must give auditors enough time to perform initial audits, surveillance audits and reassessment audits.

Members of the ILNAS – Digital Trust Department - may be present during conformity assessments.

“Audit time” includes the time spent by an auditor or audit team in stage 1 audit (documentation review), stage 2 audit (on-site audit) and planning, interfacing with organization, personnel, records, documentation and process; and report writing. Usually, about 25% of the total audit time is spent on the stage 1 audit. Where additional time is required for planning or report writing, this will not be justification for reducing on-site auditor time. Auditor travel time is not included in the audit time.

The conformity assessment body and the (Q)TSP shall, in particular, take into account the following factors when determining audit time:

- The complexity of the trust service and of the IT infrastructure,
- The number of sites to audit,
- Third party arrangements used within the scope of the concerned trust service(s),
- The standards and regulatory requirements with respect to which the trust service(s) is (are) to be certified,
- Existing certifications and previous audits.

The (Q)TSP has to inform the ILNAS – Digital Trust Department- of the planned audit time prior to the audit. The audit time has to be agreed upon with the ILNAS – Digital Trust Department- for initial audits, surveillance audits, and reassessment audits, prior to the audit.

The conformity assessment body shall indicate the stage 2 (on-site) audit time in the conformity assessment report.
