Journée Mondiale de la Normalisation

Programme de recherche ILNAS/SnT et programme éducatif ILNAS/FSTC à la normalisation

Prof. Pascal BOUVRY
Chargé de Mission auprès du Recteur
University of Luxembourg

October 2019
Strengthening ILNAS's relations with academic partners with the aim of structuring education about standardization and ad-hoc research in the Grand Duchy of Luxembourg

- **Origin:**
  - Pilot project conducted between September 2015 and September 2016: "Smart ICT for Business Innovation" university certificate in partnership with the University of Luxembourg
  - Second promotion: February 2018 to February 2019

- **Objective:** University Master on Smart ICT, technical innovation, technical standardization and digital trust (horizon 2020)
  - Will answer national priorities related to "Smart Secure ICT" topics, providing a smart way to link technology, standards and the business world, while creating an additional means of innovation at the national level
Master in Technopreneurship: Mastering Smart ICT, Standardisation and Digital Trust for Enabling Next Generation of ICT Solutions

- Smart ICT, Standardisation & Digital Trust Enabling Next Generation Solutions for Economy

Effectiveness and growth of the ICT industry are determined by the ability of the component parts to securely "talk" to each other – to interoperate.

Smart Secure ICT is a key enabler of economic growth.

Technical Standardization:
- Common Languages
- International Outcomes
- Consensus
- Business-Driven

A force multiplier for ICT innovation...

Global ICT
- Different Environments
- Various Specifications
- A lot of Requirements

Smart Secure ICT aims to combine heterogeneous systems.

Technical Standardization

Digital Trust

Global Economy

Research Programme: The Smart-ICT Team

Mr. Nader Samir
- PhD Candidate
- Industrial experience in UAVs
- Internet-Of-Things
- Distributed UAV Traffic Management

Prof. Pascal Bouvry
- Principal Investigator
- Project coordination
- PhD supervision

Ms. Saharnaz Dilmaghani
- PhD Candidate
- Standardization experience
- Artificial Intelligence and Big Data
- Network-based Clustering Algorithms

Mr. Chao Liu
- PhD Candidate
- Cloud Computing
- Optimal Pricing in Cloud Computing

Dr. Matthias Brust
- Postdoc
- Project support
- Research & standardization
IoT: Optimization Problem Description

Objectives
• Minimize total average travel time
• Minimize total average energy

Constraints
• UAVs have a limited battery life.
• Airspace segments allow different lateral velocities

Step 1
Step 2
Step 3
Step 4
AI: Network-based Clustering Algorithm for AI and Big Data Analysis

Data is Today’s Oil!

- 44 zettabytes, from 4.4 zettabytes
- 1.7 megabytes every second for every human
- 656 million tweets per day

Big Data → AI → Outcomes
Cloud Computing: Bi-Level Optimization

Max $\sum_{i}^{N} X_i P_i$

s.t. $P_i \geq 0$, $X_i \geq 0$, etc.

$\max \left[ a_i X_i - b_i X_i^2 - c (\sum_{j}^{N} X_j)^2 \right] - P_i X_i + \sum_{j \neq i} g_{ij} X_j$

$a_i \geq 0$, $b_i \geq 0$, etc.

Optimize Upper-level objective
s.t. Upper-level constraints

Observe best response

Optimize Lower-level objective
s.t. Lower-level constraints

Set decision

Concave

Convex & Continuous

Be replaced with KKT Conditions
Involvement in Standardization (SCs & WGs)

  - ISO TC 307 Blockchain and distributed ledger (WG1 and 2)
  - CLC/TC 215 WG3
- Boonyarit Changaival
  - ISO/IEC JTC 1/SC38 Cloud Computing
  - ISO/IEC JTC 1/SC42 Artificial Intelligence
Current work: Gap Analysis

- Performing analysis to understand the gaps between research and standardization, and to draw a roadmap on reducing these gaps
  - Internet-Of-Things,
  - AI/Big Data
  - Cloud Computing

A follow-up to the current research programme will be defined in the coming months
