

TIMBER STRUCTURES

"The use of timber in building construction goes back many centuries and has evolved from simple craft through prescriptive trade to sophisticated, performance based engineering."

(Source: ISO/TC 165 - Strategic Business Plan - June 2019)

MAIN TECHNICAL COMMITTEES ON TIMBER STRUCTURES STANDARDIZATION

- International level -

ISO/TC 165 – Timber structures

Standards

54

Projects

2

National delegates

0

Scope

Standardization concerning structural applications of timber, wood-based panels, other wood based products, and related lignocellulosic fibrous materials including:

- requirements for design;
- structural properties, performance, and design values of materials, products, components, and assemblies and;
- test methods and requirements to establish related structural, mechanical and physical properties and performance.

5 Working Groups

WG 2	Structural glued wood products	WG 7	Connections and assemblies
WG 10	Characteristic values and design specifications	WG 11	Solid and mechanically laminated timber products
WG 12	Structural use of bamboo		

- European level -

CEN/TC 124 – Timber structures

Standards

41

Projects

11

National delegates

0

Scope

Preparation of standards for the structural use of timber, covering:

- test methods for the determination of strength and stiffness for solid timber, glued laminated timber, mechanical joints, wood based panel products, timber structures and their components;
- solid timber: preferred sizes, strength grading and strength classes system (included glued laminated timber), evaluation of mechanical properties;
- glued laminated timber: essential requirements, production requirements and control, structural full size finger joints;
- mechanical fasteners.

6 Working Groups

WG 1	Test methods	WG 2	Solid timber
WG 3	Glued laminated timber	WG 4	Connectors
WG 5	Prefabricated wall, floor and roof elements	WG 6	Wood poles
WG 7	Preparation of the revision of harmonized standards		

MAIN STANDARDS ON TIMBER STRUCTURES

	Cross laminated timber					
ISO 16696-1:2019	Part 1: Component performance, production requirements and					
EN 16351:2021	certification scheme Requirements					
LN 10331.2021						
Laminated veneer lumber ISO 22390:2020 Structural properties						
EN 14374:2004	Structural laminated veneer lumber - Requirements					
LN 14374.2004	Bond performance of adhesives					
ISO 20152-1:2010	Part 1: Basic requirements					
ISO 20152-1:2010	Part 2: Additional requirements					
ISO/TR 20152-3:2013	Part 3: Use of alternative species for bond tests					
	•					
Durability of wood and wood-based products Use classes						
100 2 1007 .2007	Wood-based panels					
ISO 16572:2008	Test methods for structural properties					
	Uniform, concentrated static and concentrated impact loads on					
ISO 16507:2013	wood-based roof and floor panel assemblies - Test Methods					
	Structural insulated panel					
ISO 18402:2016	Structural insulated panel roof construction – Test methods					
ISO 22452:2011	Structural insulated panel walls – Test methods					
	Determination of characteristic values					
ISO 12122-1:2014	Part 1: Basic requirements					
ISO 12122-2:2014	Part 2: Sawn timber					
ISO 12122-3:2016	Part 3: Glued laminated timber					
ISO 12122-4:2017	Part 4: Engineered wood products					
ISO 12122-5:2018	Part 5: Mechanical connections
